Swedish Panel Study of Living Conditions of the Oldest Old

SWEOLD

CODE BOOK 2021

Foreword to the SWEOLD 2021 Codebook

THE SWEDISH PANEL STUDY OF LIVING CONDITIONS OF THE OLDEST OLD – SWEOLD - is a longitudinal survey based on the Swedish Level of Living Survey (LNU). The objective of SWEOLD is to continuously collect relevant, high-quality, and up-to-date data about older adults' living conditions and health. Additionally, by following up on individuals previously included in LNU, we aim to create a longitudinal dataset including the oldest old people in the population.

The first SWEOLD survey was conducted in 1992, followed by six subsequent waves (in 2002, 2004, 2011, 2014, and 2021/2022). This codebook describes the most recent data collection. More thorough descriptions of earlier survey waves are documented in three previous codebooks, available in English on the website www.sweold.se.

Sample Design

The SWEOLD sample was initially designed based on a pre-existing nationally representative sample of the adult population in Sweden—the Swedish Level of Living Survey (LNU). LNU is one of the longest-running longitudinal multidimensional surveys in the world. SWEOLD comprises all individuals who were previously part of the LNU sample but have surpassed LNU's upper age limit of 75 years and are still living in Sweden at the time of the SWEOLD survey. However, in the 2004 and 2014 surveys, the lower age limit was reduced to 70.

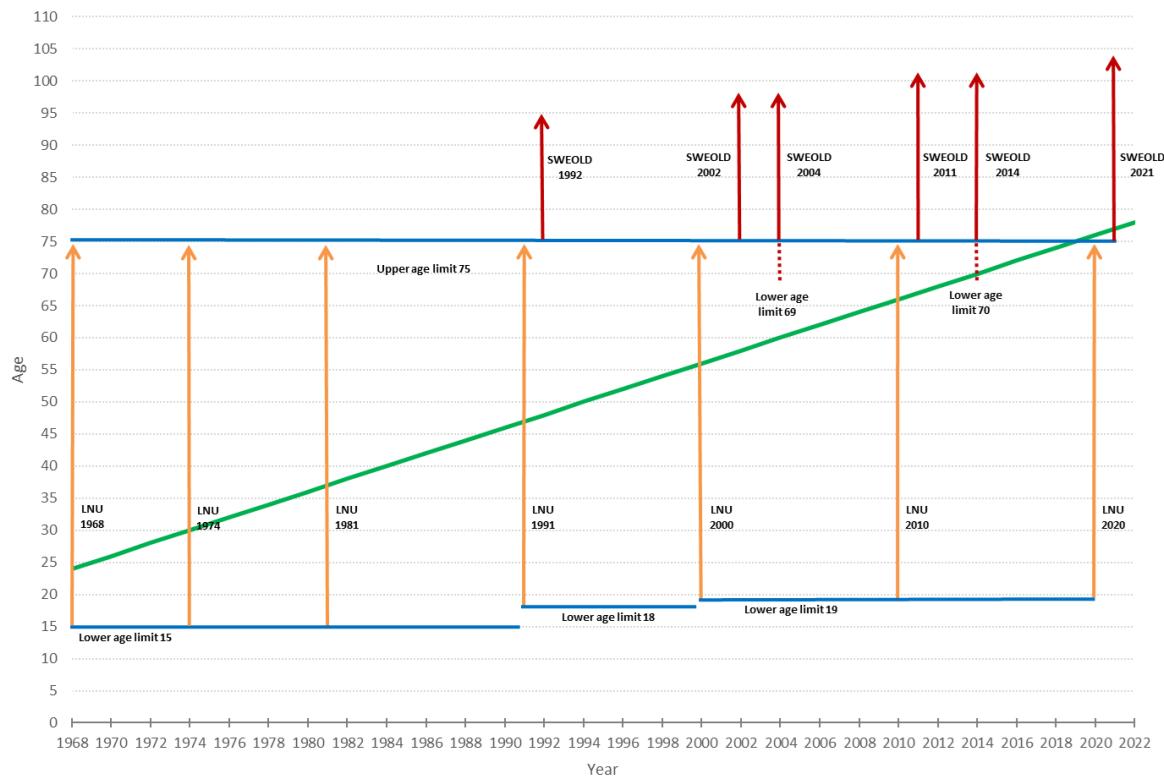

The first LNU survey was conducted in 1968. Together with the subsequent survey waves (1974, 1981, 1991, 2000, 2010, and 2020), LNU provides multidimensional, longitudinal data spanning over five decades. By combining the LNU and SWEOLD surveys, researchers have the opportunity to study living conditions over the life course, up until late life.

At every LNU survey wave, a random sample of young people and immigrants has been added to the original random sample. This was done to maintain representative samples of the Swedish population aged between 19 and 75, making the data suitable for cross-sectional analyses and generalisable to the total population. For more information on LNU, see www.sofi.su.se. The relationship between LNU and SWEOLD is illustrated in Figure 1.

Figure 1 (page iii) shows how the SWEOLD sample comprises individuals previously included in the LNU sample who have surpassed the LNU upper age limit. The orange vertical arrows indicate the year of each LNU survey, while the blue horizontal lines show the age limits in each LNU survey. The red vertical arrows represent the years of SWEOLD surveys. The green line illustrates the longitudinal design, showing that the youngest person interviewed in the 2021 wave of SWEOLD was 24 in the 1968 wave of LNU. Individuals aged 69 and older in 1968 were already too old to be included in the LNU sample in 1974. However, if they were still alive, they were included in the SWEOLD sample in 1992.

The sample design tends to make the SWEOLD samples small due to mortality. Therefore, in 2021 (and in 2011), the LNU-based sample was complemented by additional random samples of the Swedish population aged 85 and over (in 2011 aged 85–99), obtained through the Swedish identification number. These additional samples allow for more detailed analyses of smaller subgroups for those over 85 years of age. Since the probability of inclusion in the additional sample varied across sex and age-groups, SWEOLD includes weights to adjust for the differences in inclusion probabilities.

Figure 1. Sample design

As the additional samples were drawn separately by sex and age group, the weights were created by dividing the number of persons in the population by the number of persons in the sample for a combination of sex and age groups (77-84, 85-89, 90-94, and 95+). For women and men separately, the sampling weights were scaled down by dividing them by the highest weight, resulting in a variable with 1.0 as the maximum value for both women and men.

In 2021, two additional regional samples were added to the SWEOLD sample: a random sample of older people aged 85 and older living in Stockholm County and a random sample of people aged 77 years and older living in Dalarna County. These initiatives were developed in cooperation between researchers, regional policymakers, and local authorities. The two samples followed the same questionnaire as SWEOLD but also included a few additional questions specific to each county. The two samples can be used separately or together with the original sample if the regional sample weight variable is used. Frequency tables for the regional samples are shown in separate codebooks (more information at www.sweold.se).

Non-response

Today, most surveys (both cross-sectional and longitudinal) face declining response rates. If non-responders deviate from respondents, the survey's generalisability and representativeness are compromised. Therefore, the exit or non-participation behaviours of individuals in surveys can lead to bias in the data if they are non-random in relation to the characteristics of interest. For instance, if people with good health were more likely than non-healthy people to participate in the survey, the cross-sectional results would likely be biased. Similarly, if they remained in the survey between waves to a greater extent, longitudinal results based on the data may be biased to the extent that they no longer provide an accurate depiction of reality.

The impact of attrition and non-response bias between SWEOLD 2014 and 2021 surveys has been analysed in relation to several health-related indicators (for a more thorough description, see Ramos Serrano et al., 2023). The analyses showed indications of selective attrition between these waves; however, the effect seems to be limited. In particular, people with worse self-rated health, more depressive symptoms (GDS-4), and lower education were slightly more likely to drop out between the two waves.

Topics and Questions

The SWEOLD surveys cover items of special importance to older adults, including diseases and disorders, physical and cognitive health, functional ability (measured by subjective questions and objective tests), healthcare utilisation and social care, activities of daily living, health behaviours, family and social relations, financial conditions, political participation, leisure time activities, etc. New items in SWEOLD 2021 include a screening test for health literacy, questions on mobility patterns, and the UCL loneliness scale.

SWEOLD 2021 – A Chronological Account

The SWEOLD 2021 project began in 2019 with the preparation of ethical applications for the study. In the fall of 2019, preparations were started for the fieldwork, including designing the questionnaire for CAPI (Computer-assisted personal interviewing) and a postal questionnaire, as well as designing and printing an introduction letter and a brochure describing the SWEOLD study. In late 2019, the sample was drawn by Statistics Sweden. Interview training took place in March 2020 for the interviewers hired to conduct the interviews. However, the work with the survey was halted due to the COVID-19 pandemic outbreak. After realising that the pandemic would likely be long-lived, we changed the interview mode from in-person visit interviews to telephone interviews. The questionnaire was modified, shortened, and redesigned for CATI (Computer-assisted telephone interviewing).

The fieldwork resumed in June 2021, accompanied by an additional four-hour training course for the interviewers. These interviewers were employed by Ipsos Observer Sweden AB (Ipsos). Approximately ten professional interviewers and one team leader from Ipsos participated in special training sessions to acquaint them with the questionnaire and the study's background. The training was led by the SWEOLD project leadership team. At the beginning of 2021, information on the respondents' last known addresses was obtained from the Swedish Tax Authority using personal registration numbers. This allowed us to find addresses and information on the respondents' vital status for all individuals in the sample.

The fieldwork was subsequently conducted from June 2021 to May 2022. The SWEOLD project team was actively involved in sorting out day-to-day problems during the fieldwork and providing respondents or their relatives with more information about the study. The average interview length ranged between 58-68 minutes.

To mitigate the risk of non-response due to poor health or impaired cognition, we employed mixed interview methods. The primary mode of interview was direct telephone interviews with the respondents. Respondents who were unable or refused to participate were offered the option to have a close relative support them in the interview (mixed interview). Alternatively, they could choose to respond to a postal questionnaire. Indirect interviews were conducted if the participant was unable to answer questions through the methods described above. These indirect interviews were conducted with either close relatives or healthcare personnel. Dementia or frailty were among the most common reasons for indirect interviews.

Information from indirect interviews is included in this study to provide a comprehensive understanding of the living conditions of the oldest old adults in the population. Respondents interviewed directly in person, by telephone, or by postal questionnaire are referred to as direct interviews.

The response rate for the SWEOLD 2021 wave was 64%, which was lower than in previous interview waves. One common challenge encountered by the interview team during the latest wave was the difficulty in reaching participants by phone. To address this, we introduced the number from which the interviewer would call in the reminder letter. Ipsos also dedicated significant effort to finding the correct contact information for all people in the sample. In May 2022, the raw data file was delivered to the Institute for Social Research at Stockholm University and transferred to ARC. Subsequent tasks involved data cleaning, coding, and constructing new variables and indexes.

The resulting dataset is documented in this codebook, which includes frequencies, variable names, and value labels, along with details on variable construction. All variable names start with the letter P and are numbered from 1 to 380. The codebook provides frequencies and the number of valid cases for all included variables, and in some cases, it includes the minimum value, maximum value, mean, and standard deviation. Information about identically or comparably construed variables from the five previous SWEOLD surveys and six previous LNU surveys is also presented.

In each survey year, the variable names start with a unique letter. Variable names starting with the letter Q correspond to SWEOLD 1992; Z to SWEOLD 2002, S to SWEOLD 2004, C to SWEOLD 2011, and L to SWEOLD 2014. The variable names for LNU 1968 start with the letter W, LNU 1974 with V, LNU 1981 with U, LNU 1991 with Y, LNU 2000 with X, LNU 2010 with Z, and LNU 2020 with C.

The execution and maintenance of the SWEOLD study 2021 are financed by the National E-infrastructure on Aging Research NEAR with support from the Swedish Research Council (Vetenskapsrådet).

We would like to thank all our colleagues at Ipsos AB for their dedicated effort during the fieldwork, as well as to all the participants and their caregivers/relatives for their participation in the survey. We also extend our thanks to all our colleagues in the SWEOLD project group at ARC for their valuable inputs on the questionnaire.

Finally, we would like to give special thanks to Erika Augustsson, Naima Kayser Leeoza, Robin Ramos Serrano, Simon Helperin, Caroline Westerlund, and Xinru Liang for their contributions to organising the data, performing necessary corrections, coding social class, and making decisions about codes for different types of non-response. They have also devoted considerable effort to transforming the data into legible tables and working on the layout of the dataset and codebook.

P205 Mini-mental state examination (MMSE SF-C)

Cognitive performance is based on items from the Mini Mental State Examination (Folstein et al., 1975)². The short form consists of four domains:

1. Registration: Registering and repeating three objects (one point if all three registered in one trial).
2. Orientation: Which weekday/year/month/date is it now? What country are we in? (one point for each correct answer).
3. Delayed recall: Repeat the three objects from the first task (one point for each correct answer).
4. Attention/concentration: Subtract 7 from 100, repeat five times (0.4 points for each correct answer).

Thus, the scoring range is between 0 and 11, with values rounded to the closest integer. The test has been described in detail by Ericsson et al. (2016)³.

L227, C360, cf. S235,
cf. Z512, cf. Q129, cf. X832,
cf. Y647, cf. U702

I have asked you a number of questions about your living conditions. Now I would like to ask you a few questions regarding how you see life and yourself as a person.

I want to ask you how satisfied you are on a scale from zero to ten. Zero means that you feel completely dissatisfied. Ten means that you feel completely satisfied. Five is in the middle of the scale and means that you are neither satisfied nor dissatisfied.

So, I would like to ask you: Thinking about your own life and personal circumstances, how satisfied are you with your life as a whole (today)?

Weight variables

P373 Sample Weight 1

In SWEOLD 2021, an additional random sample of older adults aged 85+ were included in the survey. Sampling weights have been created by dividing the number of persons in the total population with the number of persons in the sample, by sex and birth cohort. (Ages 100+ are not oversampled and have the same weight as the youngest age group). These sampling weights were then scaled down by dividing them by the highest weight, resulting in a variable with 1.0 as the maximum value for both men and women.

In STATA the weight variable should be included as [pw=weight] when possible and [aw=weight] in other instances.

Appendix. The questionnaire in Swedish.

The following appendix presents the questions that have been used as the basis for variables in the SWEOLD 2021 database as well as the code book.

The design of the code book largely follows the design used in the original questionnaire.

In the SWEOLD 2021 field work the interviews were carried out by telephone call to the participant's home or the institutions where they live and were based on a structured questionnaire. The interviewers used telephone-assisted personal interviewing (CATI). Thus, no paper questionnaires were used by the interviewer.

Introduktion: Undersökningen om äldre personers levnadsvillkor handlar om en mängd olika aspekter av ditt liv. Därför kommer jag att ställa frågor om bland annat din hälsa, vad du gör och hur du klarar din vardag. Vi kommer också att göra några tester av minnet och din fysiska funktionsförmåga.

FAMILJ

1. Bor du ensam?

If V=3 skip

- 1 Ja → gå till fråga 2
2 Nej

1.1 Hur många andra personer bor du med?

Samtliga personer som faktiskt bor i bostaden skall tas med. Du ska inte räkna med dig själv.

Antal personer

1.2 Vem eller vilka andra personer bor du tillsammans med?

Flera svar kan anges.

- 1 Äkta man/hustru/sammanboende
2 Barn/svärdotter/svärson
3 Syskon
4 Annan

2. Vilket är ditt nuvarande civilstånd? Är du...

"Ogift" innefattar aldrig tidigare gift och aldrig tidigare sammanboende (under en längre tid).

- 1 Ogift → gå till fråga 4
2 Gift/sammanboende → gå till fråga 5
3 Frånskild/tidigare sammanboende
4 Änka/änkling

3. Vilket år blev du änka/änkling/frånskild?

Om IP har svårt att komma ihåg vilket år skilsmässan/separationen var eller när hen blev änka/änkling skriv ner årtiondet. Exempelvis om IP blev änka/änkling på 50-talet, skriv 195X

4. Är du särbo?

Den vedertagna definitionen lyder "två personer som är i ett äktenskapsliknande förhållande men inte bor i samma hushåll".

Hoppa över om fråga 2=2 (gift/sammanboende)

- 1 Ja
2 Nej

BARN

5. Har du eller har du haft några barn?

Här ska IP även räkna med adoptiv- och styvbarn samt avlidna barn.
Även fosterbarn tas med om IP jämställer dem med egna barn.

- 1 Ja
2 Nej → gå till fråga 7

5.1 Hur många barn som lever nu har du sammanlagt?

Frågan avser endast antal barn som är i livet idag. Här ska IP även räkna med adoptiv- och styvbarn, samt även fosterbarn tas med om hen jämställer dem med egna barn.

_____ Antal barn

Om IP har 1 barn:

Nu ska jag ställa några frågor om ditt barn.

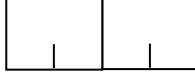

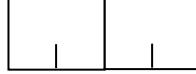

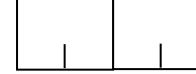

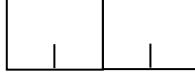

Om IP har 2 eller fler barn:

Nu ska jag ställa några frågor om vart och ett av dina barn. Vi börjar med det äldsta barnet.

Fråga 5c	Om IP har svårt att komma ihåg födelseår, försök få fram årtiondet. Exempelvis om barnet är fött på 50-talet, skriv 195X.
Fråga 5f	<p>Försök att få fram så precisa uppgifter som möjligt. Allmänna beteckningar som tjänsteman, ingenjör, officer, sekreterare, montör eller liknande räcker inte. Om IP svarar något sådant måste du be om precisering.</p> <p>Vid uppgifter som kamrer, direktör, avdelningsföreståndare, eller liknande, försök få en uppgift om företagets storlek. Det är alltid fördelaktigt med en uppgift om arbetsgivaren, t.ex. kamrer vid större affärssbank, direktör i mindre trävarufirma etc.</p> <p>Om egen företagare, ange både det och en yrkesbeteckning t.ex. egen företagare, järnhandlare eller egen företagare, arkitekt.</p> <p>Om jordbrukare eller företagare men även ett annat arbete vid sidan om jordbruket eller företaget, ange detta och om möjligt vilken sysselsättning som kan betraktas som den huvudsakliga. T. ex. Huvudsysselsättning jordbrukare, men även anställd som skogsarbetare eller huvudsysselsättning arkitekt anställd vid kommunens stadsplanekontor men även egen arkitektbyrå som bisyssa.</p> <p>Om IP svarar att barnet eller barnen inte arbetar, fråga efter tidigare huvudsakligt yrke.</p>
Fråga 5g	Läs upp svarsalternativen. Har IP svårt att uppskatta avståndet till respektive barn, anteckna bostadsortens namn och ev. Län.
Fråga 5h	Med träffas avser man träffas och umgås, inte tillfällen då man stöter på varandra utan att ha för avsikt att ses
Fråga 5j	Avser när IP och respektive barn talar i telefon/epost/sms:ar/chattar eller liknande kontakt, inte när ev. maka/make gör det
Fråga 5m	Om II = 2 hoppa över
Fråga 5n	Om II = 2 hoppa över

Om IP har fler barn: Kommande frågor handlar om ditt nästa barn i åldersordning.

Ställ samtliga barnfrågor igen.

6. Har du barnbarn och/eller barnbarnsbarn?

- 1 Ja
 2 Nej → gå till fråga 7

6.1 Hur ofta brukar du träffa och vara tillsammans med någon av dina barnbarn och barnbarnsbarn? Är det...

Avser umgänget med samtliga barnbarn och barnbarnsbarn. Ange hur ofta IP träffar ett eller flera barnbarn och/eller barnbarnsbarn, det vill säga har IP 7 barnbarn och träffar ett av dem varje dag så blir det dagligen. Har IP 7 barnbarn och träffar alla samma dag en gång om året så blir det mer sällan.

- 1 Dagligen
 2 Flera gånger i veckan
 3 Någon gång i veckan
 4 Någon gång i månaden
 5 Någon gång i kvartalet
 6 Mer sällan eller aldrig

6.1.2 Sedan pandemins start har det skett några förändringar i hur ofta du träffar dina barnbarn och barnbarnsbarn?

- 1 Nej, ingen skillnad
- 2 Träffas mer
- 3 Träffas mindre

6.2 Hur ofta brukar du ha kontakt per telefon, e-post, SMS, chatta eller annan liknande kontakt med någon av dina barnbarn och barnbarnsbarn?
Är det...

Avser kontakt med samtliga barnbarn och barnbarnsbarn. Ange hur ofta IP har kontakt med ett eller flera barnbarn och/eller barnbarnsbarn, det vill säga har IP 7 barnbarn och har kontakt med ett av dem varje dag så blir det dagligen. Har IP 7 barnbarn och har kontakt med alla samma dag en gång om året så blir det mer sällan.

- 1 Dagligen
- 2 Flera gånger i veckan
- 3 Någon gång i veckan
- 4 Någon gång i månaden
- 5 Någon gång i kvartalet
- 6 Mer sällan eller aldrig

6.2.1 Sedan pandemins start har det skett några förändringar i hur ofta du har kontakt med dina barnbarn och barnbarnsbarn?

- 1 Nej, ingen skillnad
- 2 Pratas vid mer
- 3 Pratas vid mindre

NÄRMILJÖ OCH RÖRLIGHET

Nu följer några frågor om din närmiljö, det område du rör dig inom i ditt dagliga liv och om du behöver hjälp eller använder hjälpmmedel.

7. Hur ofta brukar du lämna din bostad och vara utomhus?

- 1 Dagligen
- 2 Flera gånger i veckan
- 3 Någon gång i veckan
- 4 Någon gång i månaden
- 5 Någon gång i kvartalet
- 6 Mer sällan eller aldrig

8. Hur ofta brukar du lämna ditt närområde?

- 1 Dagligen
- 2 Flera gånger i veckan
- 3 Någon gång i veckan
- 4 Någon gång i månaden
- 5 Någon gång i kvartalet
- 6 Mer sällan eller aldrig

9. Har det skett någon förändring i dina rörelsemönster sedan coronapandemin startade?

- 1 Nej, ingen skillnad
- 2 Ja, jag går ut/reser mindre
- 3 Ja, jag går ut/reser mer

Om svarar "Ja, jag går ut/reser mindre":

9.1 Varför går du ut/reser mindre nu?

Fler svar kan anges

- 1 Oro för att bli smittad av coronaviruset
- 2 För att följa restriktionerna
- 3 Försämrad funktionsförmåga (t.ex. rörlighet, balans eller kognition)
- 4 Svårighet att få färdtjänst
- 5 Aktiviteter jag brukade gå på är inställda
- 6 Färre kollektivtrafiktyper
- 7 Annat, ange vad: _____

10. Använder du något hjälpmittel när du tar dig fram utomhus?

Om IP använder flera hjälpmittel, ange det som används mest.

- 1 Nej, går aldrig ut → gå till fråga 12
- 2 Nej, klarar mig utan hjälpmittel
- 3 Ja, med käpp(ar), bock(ar), krycka kryckor
- 4 Ja, med rollator
- 5 Ja, rullstol
- 6 Ja, annat: _____

11. Brukar du få hjälp av någon annan person när du tar dig fram utomhus?

Även tillsyn räknas som hjälp. Många med till exempel demens behöver tillsyn av någon, trots att de klarar sig utan hjälpmittel.

- 1 Ja, alltid
- 2 Ja, ibland
- 3 Nej, klarar mig själv

12. Använder du något hjälpmittel när du tar dig fram inomhus?

Om IP använder flera hjälpmittel, ange det som används mest.

- 1 Nej, sängbunden
- 2 Nej, klarar mig utan hjälpmittel
- 3 Ja, med käpp(ar), bock(ar), krycka kryckor
- 4 Ja, med rollator
- 5 Ja, rullstol
- 6 Ja, annat: _____

13. Behöver du hjälp av någon annan person när du tar dig fram inomhus?

Även tillsyn räknas som hjälp. Många med till exempel demens behöver tillsyn av någon, trots att de klarar sig utan hjälpmittel.

- 1 Ja, alltid
- 2 Ja, ibland
- 3 Nej, klarar mig själv

Nu ska jag ställa några frågor som handlar om hur enkelt det är för dig att ta dig till olika platser när du vill eller behöver det. Svara hur enkelt det är även om du just nu inte har något behov av att gå dit.

14. Hur enkelt är det för dig att ta dig till...?

If V=3 or 4 skip

	Mycket lätt	Ganska lätt	Ganska svårt	Mycket svårt
a) Närmaste bank/ uttagningsautomat	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	4 <input type="checkbox"/>

HÄLSA

Nu kommer jag att fråga om din hälsa.

16. Först vill jag fråga lite mer allmänt om hur du mår. Hur bedömer du ditt allmänna hälsotillstånd? Är det gott, dåligt eller något däremellan?

Frågan avser att ge ett sammanfattande mått på hur IP bedömer sitt hälsotillstånd. Det är en övergripande bedömning, inga detaljer.

- 1 Gott
- 2 Dåligt
- 3 Något däremellan

17. Har du själv, eller någon du känner haft covid-19/corona?

Fler svar kan anges.

- 1 Ja, jag själv → fråga 17.1
- 2 Ja, anhörig → fråga 17.2
- 3 Nej

Om ja, jag själv

17.1 Hade du lätta eller svåra besvär?

- 1 Lätta besvär
- 2 Svåra besvär

Om ja, anhörig

17.2 Hade din anhöriga lätta eller svåra besvär?

- 1 Lätta besvär
- 2 Svåra besvär

Fråga 18-24 avser mer stadigvarande förhållanden och inte besvär som klart är tillfälliga. Om IP frågar så gäller det både med och/eller utan hjälpmmedel.

	Ja	Nej
18. Kan du promenera 100 meter någorlunda raskt utan besvär?	1 <input type="checkbox"/>	2 <input type="checkbox"/> → fråga 20
19. Kan du springa 100 meter utan större besvär?	1 <input type="checkbox"/>	2 <input type="checkbox"/>
20. Kan du gå uppför och nedför trappor utan besvär?	1 <input type="checkbox"/>	2 <input type="checkbox"/>
21. Kan du resa dig från en köksstol, utan att använda armstöd, utan besvär?	1 <input type="checkbox"/>	2 <input type="checkbox"/>
22. Kan du lyfta och bära en 5-kilos matkasse?	1 <input type="checkbox"/>	2 <input type="checkbox"/>

23. Hur lång är du?

IPs nuvarande längd i upprätt tillstånd ska anges. Om IP svarar att längden gällde förr är det också okej bara vi får en längd.

..... (cm)

24. Hur mycket väger du?

Om IP är osäker eller inte kan svara, så försök ändå få ett ungefärligt svar.

..... (kg)

25. Kan du stå utan stöd?

- 1 Ja
- 2 Nej, men kan sitta
- 3 Nej, är sängbunden eller motsvarande

MEDICIN

26. Har du tagit några mediciner de senaste 14 dagarna?

Frågan avser både receptfria och receptbelagda mediciner. Att kunna sköta sina mediciner innebär att medicinerna tas i rätt tid och dos, samt att de administreras/intas enligt anvisning.

- 1 Ja
- 2 Nej
- 8 Vet ej

26.1. Klarar du att själv sköta dina mediciner?

- 1 Ja, helt själv (med eller utan dosett)
- 2 Ja, om någon laddar dosetten
- 3 Ja, med ApoDos
- 4 Nej

SJUKDOMAR OCH BESVÄR

Nu kommer jag att ställa några frågor om vanliga sjukdomar och besvär.

27. Har du under de senaste 12 månaderna haft någon av följande sjukdomar eller besvär?

Gå igenom punkt för punkt. Vid ja-svar: fråga om lättä eller svåra besvär.

Nej	Ja, lätta	Ja, svåra

33. Känner du dig oftast glad och nöjd?	1 <input type="checkbox"/>	2 <input type="checkbox"/>

Nu kommer några frågor om hörsel och syn

34. Kan du utan svårighet höra vad som sägs i ett samtal mellan flera personer?

- 1 Ja, utan hörapparat
- 2 Ja, med hörapparat
- 3 Nej

35. Kan du utan svårighet höra vad som sägs i ett samtal med en annan person?

- 1 Ja, utan hörapparat
- 2 Ja, med hörapparat
- 3 Nej

36. Kan du utan svårigheter läsa en tidning?

- 1 Ja, med eller utan glasögon
- 2 Ja, med synhjälpmittel (såsom förstoringsglas, platta, förstoringsmaskin)
- 3 Nej, har vissa svårigheter
- 4 Nej, inte alls

VÅRDUTNYTTJANDE

Nu kommer vi in på ett avsnitt som handlar om vårdutnyttjande, men först kommer några påståenden om du kan hitta och använda information som har med hälsa och sjukdomar att göra, om du behöver det.

If II = 2 skip 37-41

	Stämmer inte alls	Stämmer dåligt	Stämmer delvis	Stämmer bra	Stämmer precis

38. Jag kan välja ut just den information som jag behöver från en mängd informationskällor	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	4 <input type="checkbox"/>	5 <input type="checkbox"/>
39. Jag kan förstå informationen och dela med mig av den till andra	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	4 <input type="checkbox"/>	5 <input type="checkbox"/>
40. Jag kan bedöma om informationen är trovärdig	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	4 <input type="checkbox"/>	5 <input type="checkbox"/>
41. Jag kan med hjälp av informationen planera och avgöra vad jag behöver göra för att förbättra min hälsa	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	4 <input type="checkbox"/>	5 <input type="checkbox"/>
42. Har du under de senaste 12 månaderna sökt läkare för egna sjukdomar eller besvär? Flera svar kan anges	1 <input type="checkbox"/> Ja, besökt läkare på vårdcentral 2 <input type="checkbox"/> Ja, besöks av läkare från vårdcentral 3 <input type="checkbox"/> Ja, via nätdoktor (exempelvis KRY, doktor.se, mindoktor.se och liknande) 4 <input type="checkbox"/> Annan läkare (specialist- eller sjukhusvård) 5 <input type="checkbox"/> Nej				
43. Har du någon gång under de senaste 12 månaderna besökt eller besöks av sjuksköterska, distriktsköterska, eller dylikt? Besöket ska ha avsett egna besvär.	1 <input type="checkbox"/> Ja 2 <input type="checkbox"/> Nej				

44. Har du någon gång under de senaste 12 månaderna avstått från att besöka läkare trots att du haft behov av detta?

- 1 Ja
2 Nej → gå till fråga 45

44.1 Avstod du från att söka läkarvård på grund av
Flera svar kan anges.

- 1 Svårigheter att betala patientavgiften?
2 Svårigheter att få tid/vård?
3 Svårigheter att ta sig till läkare?
4 Väntar ut eller sköter besvären själv?
5 Brist på förtroende för läkare?
6 Oro över att bli smittad av corona?
7 Vill ej belasta sjukvården under coronapandemin?
8 Andra skäl, nämligen

45. Har du besökt någon tandläkare under de senaste 12 månaderna?

2 Nej

46. Har du någon gång under de senaste 12 månaderna avstått från att besöka tandläkare trots att du haft behov av detta?

- 1 Ja
2 Nej → gå till fråga 47

46.1 Avstod du från att söka tandläkare på grund av...

- Flera svar kan anges
- 1 Svårigheter att betala patientavgiften?
2 Svårigheter att ta sig till tandläkaren?
3 Kan inte sitta/sätta sig i behandlingsstolen?
4 Tandläkarskräck/brist på förtroende för tandläkare?
5 För trött, orkar inte?
6 Oro över att bli smittad av covid-19/corona?
7 Annan orsak, nämligen

47. Vilken av följande beskrivningar stämmer bäst på dina tänder?

För att snabba på svaret kan du säga att alternativen 3-5 är för dem som bara har egna tänder, medan alternativen 1-2 är för övriga.

Om IP tvekar mellan alternativen 4 och 5 kan du säga att 4 är för de fall då man haft många fel men lagat dem, t.ex. lagnings i de flesta kindtänderna eller någon rotfyllning, jacketkrona eller guldbrygga. Alternativ 5 är för de fall då man inte har haft några fel eller småfel som lagats allt eftersom.

Om IP har stifttänder, markera det alternativ som passar bäst

- 1 Inga tänder eller bara tandrester → gå till fråga 48
- 2 Helprotes (lösgom) eller delprotes
- 3 Egna tänder i dåligt skick: många saknas etc. → gå till fråga 48
- 4 Egna täder: många lagningar eller fasta bryggor eller implantat → gå till fråga 48
- 5 Egna täder i gott skick: inga eller få lagningar → gå till fråga 48

47.1 Fungerar de avtagbara tandproteserna bra eller har du besvär med dem?

- 1 Fungerar bra
- 2 Har besvär med dem

HÄLSOBETEENDEN

48. Röker du eller har du rökt?

Som rökare räknas alla som röker 1 cigarett (2 pipstopp, $\frac{1}{2}$ cigarr) i genomsnitt per dag. Tillfällighetsrökare räknas alltså inte om de röker mindre än 7 cigaretter (eller motsvarande antal stopp, cigarrer) per vecka eller 30 per månad. Om IP röker pipa eller cigarrer skall **du** räkna om konsumtion till cigaretter enligt schablonen inom parantes

- 1 Ja, men mindre än 10 cigaretter per dag eller motsvarande
- 2 Ja, 10 cigaretter eller fler per dag eller motsvarande
- 3 Har slutat
- 4 Nej, har aldrig rökt → gå till fråga 49

48.1 Hur många år har du rökt sammanlagt?

.....

Antal år

49. Hur ofta brukar du dricka vin, starköl eller sprit?

- 1 Nästan varje dag (minst 5 dagar/vecka)
- 2 Några gånger per vecka (3-4 ggr/v)
- 3 Någon gång per vecka (1-2 ggr/v)
- 4 2-3 gånger per månad
- 5 En gång per månad
- 6 1-6 gånger per år
- 7 Aldrig → gå till fråga 52

50. Hur många glas dricker du en typisk dag då du dricker alkohol?

Med ett glas menas en starköl, ett glas vin, 4 cl sprit eller motsvarande.

.....

Antal glas

Med ett glas menas:

51. Hur ofta dricker du 5 glas eller fler vid samma tillfälle?

- 1 Nästan varje dag (minst 5 dagar/vecka)
- 2 Några gånger per vecka (3-4 ggr/v)
- 3 Någon gång per vecka (1-2 ggr/v)
- 4 2-3 gånger per månad

- 5 En gång per månad
- 6 1-6 gånger per år
- 7 Aldrig

52. Hur ofta brukar du ha med färsk grönsaker i kosten?

- 1 Varje mål
- 2 Åtminstone ett mål om dagen
- 3 Nästan varje dag
- 4 Någon gång i vecka
- 5 Nästan aldrig

53. Hur ofta äter du lagad mat?

- 1 Åtminstone en gång om dagen
- 2 4-6 dagar i veckan
- 3 1-3 dagar i veckan
- 4 Någon gång i månaden
- 5 Nästan aldrig

53.1 Har det skett någon förändring i hur ofta du äter lagad mat sedan pandemin började?

- 1 Nej, ingen skillnad
- 2 Ja, jag äter lagad mat oftare
- 3 Ja, jag äter lagad mat mer sällan

MINNESÖVNINGAR

Nu ska vi göra några minnesövningar.

Om fråga II = 2, skippa → fråga 61

Följande frågor avser olika typer av minnesövningar

54. Jag kommer först att nämna tre föremål som jag vill att du lägger på minnet: Nyckel, tandborste, lampa. Kan du vara snäll att repetera?

Säg varje ord sakta och tydligt. Repetera orden max 5 gånger.

- 1 Ja, IP klarade repetitionen
2 Nej, IP klarade inte repetitionen

Ge inga ledtrådar. Om IP svarar fel, kryssa för "fel", ställ inte frågan igen.

IP får titta i sin kalender/almanacka om hon/han frågar efter detta.

Om IP svarar fel, men rättar sig själv på en gång, kryssa för "rätt".

Om IP svarar fel, men får hjälp av någon annan och svarar rätt, kryssa för "fel".

Försök att inte informera IP om svaret är rätt eller fel, fortsätt bara till nästa fråga. Förklara att någon annan sedan kommer att bedöma svaren.

Om IP inte svarar på några frågor, notera detta.

kryssa här.		
59. Vilket land befinner vi oss i?	1 <input type="checkbox"/>	2 <input type="checkbox"/>

60. Kan du upprepa de tre föremål jag nämnde nyss?

Ge inga ledtrådar. Ordningen på orden spelar ingen roll.

Som undantag kan man här, för artighets skull, berätta för IP vilket/-a ord hon/han glömt.

Men endast efter att de orden kryssats i som "fel".

	Ja	Nej
Nyckel	1 <input type="checkbox"/>	2 <input type="checkbox"/>
Tandborste	1 <input type="checkbox"/>	2 <input type="checkbox"/>
Lampa	1 <input type="checkbox"/>	2 <input type="checkbox"/>

61. Utgå från talet 100 och dra ifrån sju (7). Fortsätt sedan att dra ifrån sju (7) från det tal du får.

Skriv upp det som IP säger, rätta inte. Fortsätt utifrån det sista talet, oavsett om det är korrekt, tills IP svarat 5 gånger.

ATT KLARA SIN VARDAG

Nu följer ett antal frågor om vardagliga hushållssysslor och personlig omvårdnad.

Frågeupplägget "Brukar du göra själv...", "Vem brukar hjälpa dig..." och "Skulle du klara om nödvändigt...", är till för att fånga in exempelvis en person som skulle klara av att laga mat om de var tvungna, men som har någon annan som gör det.

Hjälpmedel får användas vid alla aktiviteter och räknas inte som hjälp.

Hemtjänst omfattar kommunal hemtjänst, privatiserad "kommunal" hemtjänst och hemsjukvård. Med privat köpt hjälp avses hjälp som man betalar för ur egen ficka och som inte administreras genom kommunen.

Om V=3 eller 4 → fråga 65

62. Brukar du köpa mat själv?

- 1 Ja, helt själv → gå till fråga 63
- 2 Ja, med hjälp
- 3 Nej, inte alls
- 4 Nej, på grund av coronapandemin

62.1 Vem/vilka brukar hjälpa dig med att köpa mat?

Flera svar kan anges.

- 1 Maka/make/sammanboende
- 2 Dotter/döttrar (ange namn):
- 3 Son/söner (ange namn):
- 4 Annan kvinnlig släkting
- 5 Annan manlig släkting
- 6 Annan person
- 7 Hemtjänsten
- 8 Privat köpt hjälp (Även "plustjänster" från hemtjänst, RUT-tjänster etc.)

62.2 Skulle du kunna klara matinköp själv?

- 1 Ja
- 2 Nej

63. Brukar du laga mat själv?

Att kunna laga mat innebär att kunna klara sig i köket och tillreda maten.

- 1 Ja, helt själv → fråga 64
- 2 Ja, med hjälp
- 3 Nej, inte alls

63.2 Skulle du kunna klara av matlagningen själv?

- 1 Ja
2 Nej

64. Brukar du sköta städningen själv?

Städning innebär vanliga städjobb såsom att dammsuga, damma osv. Storstädning, t.ex. vid lägenhetsflytt, och fönstertvätt räknas inte. Städningskvalitet avgör IP själv.

- 1 Ja, helt själv → gå till fråga 65
2 Ja, med hjälp
3 Nej, inte alls

64.1 Vem/vilka brukar hjälpa dig med städningen?

Flera svar kan anges.

- 1 Maka/make/sammanboende

64.2 Skulle du kunna sköta städningen själv?

- 1 Ja
2 Nej

Nu följer några frågor om personliga göromål. "Helt själv" i följande frågor innebär att du kan utföra nedanstående utan hjälp och tillsyn av annan person. Hjälpmedel får användas.

Fråga 66	IP klarar sig helt själv om hon/han kan ta sig till tvättplatsen och tvätta hela kroppen själv. Om IP får hjälp med att skrubba ryggen, att ta sig i och ur badkaret eller får tillsyn ska "Ja, med hjälp" markeras.
Fråga 67	"Helt själv" innebär att IP kan skära köttet, bre brödet och öppna mattförpackningar. Om IP är på sjukhus ska personalen kunna lämna matbrickan utan att hjälpa IP att äta. "Med hjälp" innebär att IP får hjälp med att skära, bre osv. "Inte alls" innebär att IP inte kan föra maten själv från tallriken till munnen. Inkluderar sondmatning och näringssdropp.
Fråga 68	"Helt själv" innebär att IP tar sig till toaletten, ordnar kläderna och torkar sig. Använder IP blöja även dags tid, markera "Nej, inte alls".
Fråga 69	"Helt själv" innebär att IP kan ta fram kläderna och klä på sig utan tillsyn. Hjälpmedel får användas. Har IP protes eller korsett som hon/han inte kan sätta på sig själv, kryssa för "Ja, med hjälp" och anteckna.
Fråga 70	"Helt själv" innebär att IP kommer i och ur sängen utan hjälp eller tillsyn. Hjälpmedel eller speciella sängar får användas.
Fråga 71	Att kunna klippa tånaglarna kräver att man har god syn, handstyrka och att man kan nå tårna.

AKTIVITETER, FRITID OCH POLITISKT DELTAGANDE

Nu ska vi prata om aktiviteter och deltagande i samhället

87. Brukar du göra något av följande?

Läs upp aktiviteterna en i taget. Gå igenom punkt för punkt. Vid Ja-svar, fråga om IP gör det någon gång eller ofta.

Om det uppstår diskussion om vad som skall vara gränsen mellan någon gång eller ofta kan 10 gånger per år eller färre kodas som någon gång. Denna gräns passar inte bra för alla aktiviteterna men det är enklast att dra den där för samtliga. Om man sprider ut aktiviteterna över hela året motsvarar den gränsen ungefär en gång per månad.

Barnen ska inte räknas in bland släktingar.

BEDÖMNINGAR OCH PERSONLIGHET

Jag har ställt en mängd frågor om dina levnadsförhållanden. Nu skulle jag vilja ställa några frågor som handlar om hur du ser på dig själv och ditt liv.

Dessa frågor avser IP:s egen värdering hur hon/han ser på sig själv och sitt liv. Frågorna avviker därmed en del från de övriga i formuläret. Frågorna skall bland annat användas för analyser av skillnader i hälsa mellan olika mäniskor, beroende på personliga egenskaper.

Jag vill fråga dig hur nöjd du är med ditt liv på en skala från noll till tio. Noll betyder att du känner dig mycket missnöjd. Tio betyder att du känner dig mycket nöjd. Fem är i mitten av skalan och betyder att du varken känner dig nöjd eller missnöjd.

95. Då vill jag fråga dig: På det hela taget, hur nöjd är du med ditt liv (idag)?

Frågan avser IP:s egen värdering av hur nöjd hon/han är med sitt liv idag

- 0 0 Mycket missnöjd
1 1
2 2
3 3
4 4
5 5 Varken nöjd eller missnöjd
6 6
7 7
8 8
9 9
10 10 Mycket nöjd

98 Vet ej

96. Händer det att du besväras av ensamhet?

Frågan avser känslan av ensamhet. Känsla av ensamhet kan uppkomma även om personen har sällskap/är bland andra mäniskor.

- 1 Nästan alltid
2 Ofta
3 Sällan
4 Nästan aldrig

97. I vilken utsträckning har du under pandemin besvärats av ensamhet jämfört med tidigare?

- 1 Mer än tidigare
2 Mindre än tidigare
3 Ingen skillnad mot tidigare

BILAGA TILL FORMULÄRET

Följande frågor ställdes endast till extraurvalet. Anledningen till detta beror på att personerna i extraurvalet aldrig tidigare varit med i levnadsnivåundersökningen där frågor om utbildning och barndomsförhållanden ställs.

SÄRSKILDA FRÅGOR TILL PERSONER FRÅN EXTRAURVALET

1. Hur många år har din sammanlagda skol- och yrkesutbildning på heltid varat?

Från första klass och uppåt. Deltidsutbildning räknas om till motsvarande tid på heltid. Om IP själv tar upp lärlingstid - räkna med den. Om IP aldrig har gått i skolan, ange 0.

..... Antal år

2. Vilken är din högsta avslutade utbildning?

Avser t.ex. folkhögskola, yrkesutbildning på speciella skolor, internutbildningar, högskola eller universitet.

- 1 Folk- eller grundskola enbart
- 2 Yrkesutbildning utöver folk-/grundskola (t.ex. yrkeslinje på gymn.)
- 3 Realexamen, 2-årig social/ekon/tekn på gymnasiet
- 4 Studentexamen, 3-4 årig teoretisk gymnasieutbildning
- 5 Högskoleutbildning (t.ex. folk-/grundskolelärare, fritidspedagog)
- 6 Universitetsexamen (t.ex. civilingenjör, ekonom, fil.kand, tandläkare)

3. Vad har du haft för HUVUDSAKLIGT yrke eller sysselsättning under din yrkesverksamma tid? (Vad var det för befattning?)

Om IP svarar hemmafru eller pensionär. Ange detta och om möjligt tidigare yrke.

Försök att få fram så precisa uppgifter som möjligt. Allmänna beteckningar som tjänsteman, ingenjör, officer, sekreterare, montör eller liknande räcker inte. Om IP svarar något sådant måste du be om precisering.

Vid uppgifter som kamrer, direktör, avdelningsföreståndare, eller liknande, försök få en uppgift om företagets storlek. Det är alltid fördelaktigt med en uppgift om arbetsgivaren, t.ex. kamrer vid större affärssbank, direktör i mindre trävarufirma etc.

Om egen företagare, ange både det och en yrkesbeteckning t.ex. egen företagare, järnhandlare eller egen företagare, arkitekt.

Om jordbruksarbetare eller företagare men även ett annat arbete vid sidan om jordbruket eller företaget, ange detta och om möjligt vilken sysselsättning som kan betraktas som den huvudsakliga. T. ex. Huvudsysselsättning jordbruksarbetare, men även anställd som skogsarbetare eller huvudsysselsättning arkitekt anställd vid kommunens stadsplanekontor men även egen arkitektbyrå som bisyssa

3.1 Markera om egen företagare eller jordbrukare.

- 1 Egen företagare
- 2 Jordbrukare
- 3 Inget av dessa → gå till fråga 4

3.1.1 Hur många anställda hade du?

- 1 Utan anställda
- 2 1-9 anställda
- 3 10-19 anställda
- 4 20 eller fler anställda

Om jordbrukare.

3.1.2 Hur stort jordbruk?

- 1 Småbruk = Mindre än 10 ha åker och inte mer än 100 ha skog
- 2 Vanligt jordbruk = Minst 10 ha åker eller mer än 100 ha skog
- 3 Storjordbruk = Minst 100 ha åker eller mer än 400 ha skog

Om IP svarar hemmafru eller pensionär. Ange detta och om möjligt tidigare yrke.

Försök att få fram så precisa uppgifter som möjligt. Allmänna beteckningar som tjänsteman, ingenjör, officer, sekreterare, montör eller liknande räcker inte. Om IP svarar något sådant måste du be om precisering.

Vid uppgifter som kamrer, direktör, avdelningsföreståndare, eller liknande, försök få en uppgift om företagets storlek. Det är alltid fördelaktigt med en uppgift om arbetsgivaren, t.ex. kamrer vid större affärssbank, direktör i mindre trävarufirma etc.

Om egen företagare, ange både det och en yrkesbeteckning t.ex. egen företagare, järnhandlare eller egen företagare, arkitekt.

Om jordbrukare eller företagare men även ett annat arbete vid sidan om jordbruket eller företaget, ange detta och om möjligt vilken sysselsättning som kan betraktas som den huvudsakliga. T. ex. Huvudsysselsättning jordbrukare, men även anställd som skogsarbetare eller huvudsysselsättning arkitekt anställd vid kommunens stadsplanekontor men även egen arkitektbyrå som bisyssa

4.1 Markera om egen företagare eller jordbrukare.

- 1 Egen företagare
- 2 Jordbrukare
- 3 Inget av dessa → gå till fråga 6

4.1.1 Hur många anställda hade han/hon?

- 1 Utan anställda
- 2 1-9 anställda
- 3 10-19 anställda
- 4 20 eller fler anställda

Om jordbrukare.

4.1.2 Hur stort jordbruk?

- 1 Småbruk = Mindre än 10 ha åker och inte mer än 100 ha skog
- 2 Vanligt jordbruk = Minst 10 ha åker eller mer än 100 ha skog
- 3 Storjordbruk = Minst 100 ha åker eller mer än 400 ha skog
